MakoNet Managed Hosted Exchange

As a business professional you're under pressure to streamline your business, become more productive and efficient, whilst making yourself more available to clients and colleagues. So when the time comes to move to Hosted Exchange, make sure you choose a platform that provides you a safe and secure, quality environment with complete peace of mind from a partner you can trust.

✔ **Communicate better** - Now, more than ever, your business needs cost effective and flexible communication tools. With Microsoft Exchange Server, you can achieve new levels of reliability and performance, help protect your communications and delight your users by meeting their demands for greater mobility.

- ✔ **Instant email** - Email becomes instant with Exchange Server to your compatible devices. Be it on your desktop using Outlook or from a web browser through the outstanding Outlook Web Access. Instant email communication extends to your mobile phone too, with synchronised access to your email from most Smart Phones.
- ✔ **Work together** - With Exchange Server, you get to share calendars, contacts across desktop, web and mobile platforms. When people work together, your business runs smoother.
- ✔ **Control your cost** - Moving your Exchange environment into the Cloud means you get all the advantages of on-site collaboration, whilst reducing the IT overhead of running on-site Exchange or Small Business Server.
- ✔ **Reduce installation costs** - By switching to Hosted Exchange, you get better control of your costs reducing the need for expensive hardware installations and ongoing maintenance.
- ✔ **Get more for less** - It costs less to move to Hosted Exchange, without sacrificing service quality. The Hosted Exchange environment is super-resilient, is fully managed and every email is scanned for viruses before it arrives in your inbox.
- ✔ **Multiple hosts** - All Hosted Exchange services are multi-hosted. Layered systems are located across geographically distributed locations so, in the event of an outage, traffic is switched to a redundant data centre and services resumed.
- ✔ **Mailbox retention** - If ever required, we can restore objects such as individual emails, calendar entries, task and contacts for deleted items up to 30 days. Optionally, we can provide indefinite retention for a small additional cost.

- | | | |
|---------------------------------|-----------------------------------|----------------------------------|
